You are given the firstname and lastname of a person on two different lines. Your task is to read them and print the following:

> Hello firstname lastname! You just delved into python.

Function Description

Complete the print_full_name function in the editor below.

print_full_name has the following parameters:

- string first: the first name
- string last: the last name

Prints

- string: 'Hello *firstname lastname*! You just delved into python' where *firstname* and *lastname* are replaced with *first* and *last*.

Input Format

The first line contains the first name, and the second line contains the last name.

Constraints

The length of the first and last names are each ≤ 10.

Sample Input 0

```
Ross
Taylor
```

Sample Output 0

```
Hello Ross Taylor! You just delved into python.
```

Explanation 0

The input read by the program is stored as a string data type. A string is a collection of characters.
